SUMMARY

Aspiring Software and AI Developer with expertise in Machine Learning, NLP, and MERN/Full-Stack Development. Proven track record in building intelligent systems, including deep learning image classifiers and semantic parsing architectures. Proficient in Python, Java, React.js, and DSA, with hands-on experience deploying scalable applications via FastAPI, Flask, and cloud environments.

EDUCATION

SRKR Engineering College	08/2023 - Present
<i>Bachelor of Technology in Computer Science and Business Systems, Bhimavaram CGPA: 7.2</i>	
Swarnandhra College of Engineering and Technology	07/2020 - 04/2023
<i>Diploma in Computer Engineering, Seetharampuram Percentage: 70.5%</i>	

SKILLS

Languages: Python, Java, JavaScript, SQL, Data Structures & Algorithms (DSA)
Web Tech: HTML5, CSS3, React.js, Node.js, MongoDB (Full-Stack development)
Cloud/DevOps: AWS, Render

PROFESSIONAL EXPERIENCE

AWS Academy / EduSkills	10/2025 - 12/2025
<i>GEN-AI Virtual Intern</i>	
- Gained hands-on exposure to core machine learning paradigms, generative AI frameworks, and cloud-hosted foundational models. - Mastered production-grade GenAI development workflows and cloud infrastructure standards guided by AWS Academy curricula.	
Blackbuck Engineers Pvt. Ltd.	05/2025 - 07/2025
<i>AI Intern</i>	
- Engineered and tested optimized prompt templates using ChatGPT models to maximize contextual accuracy and reduce text hallucination. - Applied Generative AI pipelines to streamline, automate, and process structured enterprise business logic tasks.	
Techin IT	02/2022 - 04/2022
<i>Web Development Intern</i>	
- Utilized modern HTML5 and CSS3 to build, update, and style responsive visual layouts across cross-browser client portals. - Collaborated with engineering teams to implement clean UI components and ensure compliance with web accessibility practices.	

PROJECTS

Deep Learning-Based Crop Disease Detection System	01/2026 - 03/2026
- Developed an end-to-end deep learning system utilizing transfer learning to accurately classify crop diseases from leaf images. - Created a rapid, automated visual diagnostic tool designed to provide farmers with timely, high-accuracy decision support.	
AI Resume Scanner & Ranking Platform	12/2022 - 06/2023
Built an intelligent NLP screening pipeline to automatically parse unstructured resume documents and rank applicants by job descriptions.	

- Implemented TF-IDF, Word2Vec, and BERT semantic models alongside a FastAPI/Flask backend and React.js dashboard for real-time visualization.

CERTIFICATES

- AIML Internship Certificate - IIDT Blackbucks, Vijayawada
- ChatGPT and Prompt Engineering Completion - IIDT Blackbucks, Vijayawada
